

INTERNATIONAL INFORMATION  
INTELLECTUAL NOVELTY  
REGISTRATION CHAMBER

IIINRC  
МРПНИИ

## CERTIFICATE - LICENSE

Registration No. 000287

Cipher 00018

Code 00015

Discovery, invention, novelty (technology, project etc.): **DISCOVERY**

**Grabovoi Grigory Petrovich**

**Annotation:**

New fields of information are proposed determining the properties and places of location of any objects of information that cause self-development of non-destructive fields of creation, also determining concrete technologies of the non-destructive use of a creation field. Complete identity (on the principle of automorphism, isomorphism) of any objects of information is discovered with respect to the creating field of information (protocols of the results have been notarially attested in the UN).

The discovery of the creating field of information was realized through the representation of information objects being realized on the internal surface of the sphere of the past (known) information objects. A segment of the sphere corresponding to future information that determines the components of objects being created, is found as the area of the external surface of the sphere of known information objects, this surface being determined from the projections of the fields of objects being realized to the external surface of the sphere of known objects and arises from the interaction of the information fields that are criterionally identical with respect to the creating field, through the internal fields of spheres that are dynamic with respect to the objects of realization. The discovery makes it possible to realize any directions of creative development based on the principle of self-comprehension with the use of the method of orthodox mathematics.

**Brief name: REPRODUCING SELF-DEVELOPING SYSTEMS REPRESENTING EXTERNAL AND INTERNAL FIELDS OF THE DIVERSITY OF CREATING SPHERES**

**Main idea:**

International information intellectual novelty registration chamber submits the intellectual property for registration to the International Register of Global Systems of Information, this property being acknowledged, as a creative activity, by the Academic Council of the IIINRC and by other structures as

**DISCOVERY**

The present Certificate-License is a document that entitles the owner to use this information-intellectual novelty as a property in international markets of all countries of the world.

Chairman of the Chamber,  
full member of the International  
Academy of Informatization  
and the New York Academy of Sciences  
Round seal:  
International Registration Chamber. Moscow  
Information-intellectual novelty  
Date: December 19 1997
